

KURSPLAN

Advanced Building Information Delivery, 7,5 högskolepoäng

Advanced Building Information Delivery, 7.5 credits

Kurskod:	TADS23	Utbildningsnivå:	Avancerad nivå
Fastställd av:	VD 2023-03-01	Utbildningsområde:	Tekniska området
Reviderad av:	Utbildningschef 2024-11-28	Ämnesgrupp:	BY1
Gäller fr.o.m.:	2025-08-01	Fördjupning:	A1F
Version:	4	Huvudområde:	Bebyggd miljö

Lärandemål

After a successful course, the student shall:

Kunskap och förståelse

- display knowledge of the basics of Process Modeling
- display knowledge of the basics of Information Modeling
- show familiarity with different formats used for Information Exchanges.

Färdighet och förmåga

- demonstrate the ability to create a BIM Project Execution Process
- demonstrate the ability to use the Information Models utilized today
- demonstrate the ability to develop advanced Information Exchanges.

Värderingsförmåga och förhållningssätt

- demonstrate an understanding of the roles of Process Modeling and Information Modeling in the Building Process
- demonstrate an understanding of the different roles of Asset models and Project models and the information exchanges needed to fulfill these roles.

Innehåll

The course Advanced Building Information Delivery covers the technological basics of BIM and addresses computational methods for information modeling (semantic modeling) of buildings as well as methods for process modeling. It also covers the important aspect of the interoperability of BIM software products and describes some of the standardized data formats and classification systems used for information exchange in the building industry.

The course includes the following elements:

- Process modeling
- Information modeling
- Information Delivery Specifications and Product Data Templates.

Undervisningsformer

The course consists of lectures, exercises, and seminars.

Undervisningen bedrivs på engelska.

Förkunskapskrav

Passed courses at least 90 credits within the major subject in Construction Engineering, Civil Engineering, Built Environment, Architecture Engineering, Product Development (with relevant courses in Lighting Design) or equivalent and 15 credits in mathematics, and taken course BIM - Management, Control and Evaluation, 7,5 credits, or equivalent. Proof of English proficiency is required.

Examination och betyg

Kursen bedöms med betygen 5, 4, 3 eller Underkänd.

Some course components, such as lectures, labs, or seminars, may be mandatory due to their unique and non-repeatable nature.

The final grade for the course is based on a balanced set of assessments. The final grade will only be issued after satisfactory completion of all assessments.

Poängregistrering av examinationen för kursen sker enligt följande system:

Examinationsmoment	Omfattning	Betyg
Tentamen	2,5 hp	5/4/3/U
Övningar och seminarier	5 hp	5/4/3/U

Kurslitteratur

The literature list for the course will be provided 8 weeks before the course starts.
