

COURSE SYLLABUS

Communication for Development and Social Change, 7.5 credits

Communication for Development and Social Change, 7,5 högskolepoäng

Course Code:	LCDS25	Education Cycle:	Second-cycle level
Confirmed by:	Director of Education Dec 9, 2024	Disciplinary domain:	Social sciences (80%) and technology (20%)
Valid From:	Autumn 2025	Subject group:	MK1
Version:	1	Specialised in:	A1F
		Main field of study:	Media and Communication Science

Intended Learning Outcomes (ILO)

On completion of the course, the student should be able to:

Knowledge and understanding

- have knowledge of the main conceptualizations of communication for development and social change
- explain the relationship between communication, international development cooperation and sustainability from a human rights perspective

Skills and abilities

- compare the pros and cons of different practical approaches to communication for development as tools for democracy
- generate communication strategies in the public interest that take into account the global-local links between sustainable development and human rights

Judgement and approach

- distinguish the possibilities and limits of digital information and communication technologies as a solution to underdevelopment
- reflect critically on the challenges posed by national and regional inequality to traditional approaches to communication for development

Contents

- Conceptualizations of communication for development and social change
- Practical approaches to communication for development and social change
- Communication, sustainability and human rights
- Information and communication technologies for development in the 21st century
- Global and local dimensions of communication for development and social change

Type of instruction

The teaching consists of lectures, seminars and exercises performed individually and in groups.

A learning management system is used.

Students who have been admitted to and registered for a course have the right to receive instruction/supervision for the duration of the time period specified for the particular course instance to which they were accepted. After that, the right to receive instruction/supervision expires.

The teaching is conducted in English.

Prerequisites

Passed courses of at least 45 credits from the master's programme Sustainable Communication, or equivalent.

Examination and grades

The course is graded A, B, C, D, E, FX or F.

The grades A, B, C, D and E are all passing grades. For courses with more than one element of examination, students are given a final grade based on an overall assessment of all the elements included in the course. The final grade of the course is issued only when all elements of examination have been passed.

The examination is based on the intended learning outcomes.

The course is examined through two individual written assignments (ILO 1, 2 and ILO 4, 5 and 6 respectively) and one oral examination (ILO 3).

The examination must allow for students to be assessed on an individual basis. Further information concerning assessment of specific intended learning outcomes and grading criteria is provided at the beginning of the course.

To receive a final grade for the whole course, the student must be awarded a passing grade on the individual written assignments and a Pass on the oral examination.

Students are guaranteed a minimum of three attempts to pass an examination, including the regular attempt.

If a student has failed the same examination three times, the student can request that the next attempt be graded by a new examiner. The decision to accept or reject such a request is made by the associate dean of education. A student may not make a second attempt at any examination already passed in order to receive a higher grade.

In case a course is terminated or significantly altered, examination according to the earlier

syllabus shall be offered on at least two occasions in the course of one year after the termination/alteration.

The examiner has the right to give an adapted examination or let the student carry out the examination in an alternative way provided that the intended learning outcomes can be secured and that there are exceptional reasons for this, including the student's right to targeted study support.

Registration of examination:

Name of the Test	Value	Grading
Individual written assignment I	3 credits	A/B/C/D/E/FX/F
Oral examination [†]	1.5 credits	U/G
Individual written assignment II	3 credits	A/B/C/D/E/FX/F

[†] The examination is graded Fail (U) or Pass (G).

Course evaluation

The instruction is followed-up throughout the course. A course evaluation is conducted at the end of the course. A summary and comments are published in the learning management system. The evaluation constitutes a basis for future improvements to the course.
