

## COURSE SYLLABUS

# Digitalization and Implementation Processes in School I (DIP I), 7.5 credits

*Digitalization and Implementation Processes in School I (DIP I), 7,5 högskolepoäng*

---

<b>Course Code:</b> LD1R29	<b>Education Cycle:</b> Second-cycle level
<b>Confirmed by:</b> Director of Education Mar 20, 2019	<b>Disciplinary domain:</b> Social sciences
<b>Revised by:</b> Director of Education Nov 5, 2020	<b>Subject group:</b> PE1
<b>Valid From:</b> Autumn 2021	<b>Specialised in:</b> A1N
<b>Version:</b> 3	<b>Main field of study:</b> Education

---

### Intended Learning Outcomes (ILO)

On completion of the course, the student should be able to:

Knowledge and understanding

- identify and critically discuss implications of policy documents and legal issues in digitalization processes in educational settings on a macro- meso- and micro-level
- describe and analyze implications of digital media landscapes from a market and educational perspective
- identify and critically examine conditions for communication and learning in and out of school

Skills and abilities

- design an implementation plan for a specific digitalization area
- identify and formulate issues of digital competence relevant to educational leadership, educational development and implementation in educational settings as well as teacher education

Judgement and approach

- critically evaluate reasons/incentives for and against digitalization
- discuss and assess potential implications of digitalization for communication and learning in and out of school
- critically reflect upon, and evaluate policy and legal issues of relevance for digitalization processes in education

### Contents

- Digitalization processes in school at a macro level. Policy and legislative issues
- Digitalization processes in school at a meso level. Motives and arguments for digitalization
- Digitalization processes in school at a micro level. Communication and learning inside and outside the classroom
- Leadership and teacher education issues

- The digital and media landscape from a market and educational perspective

### **Type of instruction**

The teaching consists of lectures, seminars and exercises performed individually and in groups.

A learning management system is used.

Students who have been admitted to and registered for a course have the right to receive instruction/supervision for the duration of the time period specified for the particular course instance to which they were accepted. After that, the right to receive instruction/supervision expires.

The teaching is conducted in English.

### **Prerequisites**

General entry requirements and a bachelor's degree or professional qualification (from an accredited university) of at least 180 ECTS credits with a minimum of 90 credits in educational sciences, social sciences, or related field, including independent, theoretical based work, i.e. a thesis or the equivalent. Proof of English proficiency is required. Exemption is granted from the requirement in Swedish.

### **Examination and grades**

The course is graded A, B, C, D, E, FX or F.

The grades A, B, C, D and E are all passing grades. For courses with more than one element of examination, students are given a final grade based on an overall assessment of all the elements included in the course. The final grade of the course is issued only when all elements of examination have been passed.

The examination is based on the intended learning outcomes.

### **Forms of examination:**

The course consists of three examinations. The student should, in a group together with other students, prepare and contribute to two seminars, and create and present a multimodal assignment during the course. These assignments are graded with pass or fail. At the end of the course, the student is examined by an individual written paper graded with A-F.

The examination must allow for students to be assessed on an individual basis. Further information concerning assessment of specific intended learning outcomes and grading criteria is provided at the beginning of the course.

The student must pass each examination in order to pass the course. The final grade will be dependent on the grade of the individual written assignment.

Students are guaranteed a minimum of three attempts to pass an examination, including the

regular attempt.

If a student has failed the same examination three times, the student can request that the next attempt be graded by a new examiner. The decision to accept or reject such a request is made by the associate dean of education. A student may not make a second attempt at any examination already passed in order to receive a higher grade.

In case a course is terminated or significantly altered, examination according to the earlier syllabus shall be offered on at least two occasions in the course of one year after the termination/alteration.

Registration of examination:

Name of the Test	Value	Grading
Seminars <sup>1</sup>	2 credits	U/G
Individual written assignment	5.5 credits	A/B/C/D/E/FX/F

<sup>1</sup> The examination is graded Pass (G) or Fail (U).

### Course evaluation

The instruction is followed up throughout the course. A course evaluation is conducted at the end of the course. A summary and comments are published in the learning management system. The evaluation constitutes a basis for future improvements to the course.
