Judgement and approach

- compare different theoretical perspectives on child development and functioning

- evaluate the mediating role of the environment in a child's everyday functioning and participation

Contents

- Children's functioning and children in need of special support
- Systems theory and a bio-psycho-social model for assessment and intervention
- Risk, prevention, and resilience
- Inclusion and participation
- Theoretical perspectives on interventions in childhood
- Ethical considerations concerning to evaluate interventions in natural environments and

children's right to participate in everyday life situation

Type of instruction

The teaching consists of lectures, seminars and exercises performed individually or in groups. The students are encouraged to suggest literature from their own country or from parts of the world not provided in the list of literatures. A digital learning platform is used.

Students who have been admitted to and registered on a course have the right to receive instruction/supervision for the duration of the time period specified for the particular course to which they were accepted. After that, the right to receive instruction/supervision expires.

The teaching is conducted in English.

Prerequisites

The applicant must hold the minimum of a bachelor's degree (i.e. the equivalent of 180 ECTS credits at an accredited university) within health and caring sciences, behavioural science, social work, or educational sciences, including independent, theoretical based work- i.e. a thesis or equivalent. Proof of English proficiency is required.

Examination and grades

The course is graded A, B, C, D, E, FX or F.

The grades A, B, C, D and E are all passing grades. For courses with more than one examination, students are given a final grade based on an overall assessment of all examinations included in the course. The final grade of the course is issued only when all course units have been passed.

The examination is based on active participation in seminars and course literature.

The examination must allow for students to be assessed on an individual basis. Students may not make a second attempt at any examination (or element of examination) already passed in order to receive a higher grade. Further information concerning assessment and grading criteria is provided in a study guide distributed at the beginning of the course.

Students are guaranteed a minimum of three examination occasions, including the regular occasion. If a student has failed the same examination three times, the student is entitled to request that the next examination is assessed and graded by a new examiner if possible. The decision to accept or reject such a request is made by the vice dean of education.

In case the course is terminated or significantly altered, examination according to the present course syllabus shall be offered on at least two occasions up to one year after the termination/alteration.

Name of the Test	Value	Grading
Three discussions seminar ^I	3.5 credits	U/G
Group assignment ^I	1.5 credits	U/G
Individual assignment 1	2 credits	A/B/C/D/E/FX/F
Individual assignment 2	3 credits	A/B/C/D/E/FX/F
Individual assignment 3	5 credits	A/B/C/D/E/FX/F

Registration of examination:

¹ The examination is graded Fail(U) or Pass(G)

Course evaluation

At the end of the course, a course evaluation is performed and commented on by the course coordinator and a student/students (course developer/s). The course evaluation, which is published on the relevant learning platform and submitted to the study administration, is to function as a basis for future improvements to the course.

Other information

The course requirements are to follow streamed lectures, attend lectures and seminars, read required literature, deliver written assignments on time, contribute to group papers and presentations, and participate actively in seminars.

The course is provided in half pace. It is structured as off-campus studies individually and in group, in addition to two mandatory seminar days at campus each month. The structure of the course requires students to work independently. As a digital e-learning system is used, access to computer and computer experience are of importance
